

WOODS MACHINERY RENTAL PROTECTION PLAN

Woods Machinery provides an optional Rental Protection Plan enabling customers to reduce their financial liability to repair or replace covered equipment which suffers physical damage during the rental term set forth in your Rental Contract. If elected, Woods Machinery will waive its rights to recover repair or replacement expenses with respect to the following types of losses:

- Collision
- Fire
- Hail
- Flood
- Wind
- Earthquake
- Tornado
- Vandalism
- Accidental Damage

The Rental Protection Plan is optional and may be declined if you provide proof of insurance meeting Woods Machinery's requirements prior to the commencement of your rental. The Rental Protection Plan is not insurance, nor is it a warranty provided by Woods Machinery.

The fee of the Rental Protection Plan is equal to 14% of the rental amount. The Rental Protection Plan is not applied to purchases, delivery charges, fuel, or sales tax. A deductible of 10% of the replacement and/or repair cost is the responsibility of the customer for all covered Rental Protection Plan claims.

Certain items are not covered under the Rental Protection Plan and the customer is liable to pay in full for all replacement and/or repairs costs. Determination of the following exclusions is based on the sole discretion of Woods Machinery:

- A. Intentional abuse, improper use, negligence, willful misconduct, or neglect or failure to secure and/or protect the equipment by you, your agents, employees, or contractors.
- B. Damage or excessive wear to tires or tracks.
- C. Damaged door or cab enclosure glass.
- D. Failure to properly maintain (including without limitation failure to maintain proper pressure levels or proper levels of air, water, or manufactured approved oil, fuel, lubricants, hydraulic fluid, coolant, diesel exhaust fluid and/or brake fluid).
- E. Exceeding rated operating capacity, rollovers, operation on uneven or unstable terrain, submerging, and/or striking overhead objects. Improper loading, unloading, and/or accidents in transit (including failure to follow all federal, state, and local traffic laws and regulations, and improperly securing the equipment as outlined by the manufacturer which is contained in the Operation & Safety Manual located in the covered equipment).
- F. All towing and recovery related expenses including environmental cleanup.
- H. Theft or theft by conversion, retention beyond the rental period, bad faith, or breach of contract.
- I. Exposure to hazardous materials or artificial electrical current (including explosives, combustible, radioactive, toxic, corrosive, or noxious materials).
- J. Cleaning of paint, mud, plaster, concrete, rosin, or any other material (customer is responsible for cleaning and repainting as required).

*If any loss tends to indicate a crime may have been committed, a condition of the Rental Protection Plan is the customer must file a report with the proper law enforcement authorities and furnish Woods Machinery with a copy of the said report. In addition, all damage sustained during the rental period must be reported to Woods Machinery within a 24-hour period of any occurrence.

5 REASONS WHY YOU SHOULD RENT FROM US

1. Newest Equipment: In addition to renting we also sell used equipment out of our rental fleet. Our rental fleet is frequently refreshed so you receive equipment that is reliable and almost new.

2. Selection: All jobs are never the same and one model will never satisfy your unique needs. Our rental fleet is comprised of several models so we have the right machine to tackle all of your equipment needs.

3. Flexible Rental Periods: We rent by the day, weekend, week, month or the season. Get the maximum flexibility in your rental period and huge discounts for longer term rentals.

4. Attachments: We offer the best selection of attachments which can dramatically increase the flexibility of our equipment while reducing the time it takes to complete your job.

5. Staff Knowledge: We only specialize in compact equipment. Our seasoned staff can offer you the best advice on what equipment is best suited to your individual needs.
